CARE-FREE CHRONICLE All Things Water

Low Cost Investment to Reap Big Rewards Lightning Ridge Evaporative Air Conditioners Get the Care-Free Treatment

Sixty houses with evaporative air conditioners (or "swampies" as they are affectionately known) are being fitted with Care-Free AC6 Water Conditioners.

Barriekneal Housing and Community Limited in the remote town of Lightning Ridge in northern New South Wales, Australia, has major problems with its evaporative air conditioners spending some \$50,000 a year on maintenance, replacement pads, pumps, motors and piping.

Earlier this year Barriekneal completed a four-year trial of Care-Free AC6 Water Conditioners in four of its evaporative air conditioners.

Darryl Ferguson, Chairperson of Barriekneal, said the results were outstanding. Unlike the units without Care-Free, the AC6 conditioned coolers were almost scale and corrosion free, very clean with no green slime below the water surface. Cooling pad replacement was over two years instead of lasting only months. No pumps or motors required replacement.

As a result, Barriekneal purchased 60 AC6 units and is currently installing them. Darryl expects big savings in time and money.

Care-Free Signs Deal with Canada

Care-Free Conditioners Australia earlier this month signed a Distributor/Dealership Agreement with BMD of Alberta, Canada.

According to BMD's Brent Pickard, Canadian households experience severe calcification in their plumbing systems. While Canada has far more water available than most places in regional Australia, the flow of water from the glacial mountains through major river systems results in substantial levels of minerals in its water. This means high maintenance and cost associated with their hot water heating systems.

Hot Water Systems, anodes, valves and taps have been known to corrode in only months of exposure to the Canadian water and BMD sees huge benefits in installing Care-Free CF20MKII units in the household water systems in Canada.

We wish Brent and his associates well.

Care-Free Welcomes Numurkah Pump Shop

Mark Wheeler, the proprietor of Numurkah Pump Shop, 31-33 Nelson Street, Numurkah, is convinced Care-Free Conditioners work for his irrigation and bore water users in the northern Victoria region.

He says the conditioned water is improving production and saving his customers money in fertilizer and saving water consumption.

We welcome Mark as a Care-Free Dealer.

Care-Free at Irrigation Australia

Care-Free is attending this year's exhibition in Sydney on 8-10 June.

Come and see us at Stand 289.

AUSTRALIAN IRRIGATION Conference & Exhibition 2010

Sydney Convention & Exhibition Centre

Darling Harbour
8 - 10 June, 2010

New Care-Free Website

A completely new web site is in its final stages and should go on line in the coming weeks.

Designed to be much more interactive, the site will feature special areas for our dealers and customers plus videos, testimonials, an electronic newsletter and on-line shopping.

Keep an eye out on www.carefree.com.au

Care-Free attending WTC Irrigation Expo at Echuca

Care-Free Conditioners Australia will have a stand at the Water Technology Luster 2010 Irrigation Expo on 19 and 20 May at the Echuca Racecourse. We will have our latest product range on display and look forward to speaking with our many customers and dealers in the region.

See us at Stand 63 - next to the coffee stall!

On the Road Again...

Care-Free's Geoff Breust visited dealers, potential new dealers and customers in central and northern Victoria and southern New South Wales in mid April.

When Your Pool is Dirty it Looks at You... When it's Clean, You Look at it.

Peter Zotti
Pool Owner
Wagga Wagga

"This is what Peter Zotti said to me when we recently installed a Care-Free SWP40MkII Conditioner to his swimming pool in Wagga," says Bob Uden, Care-Free Director.

"The last thing you want is your swimming pool looking back at you!"

When you think about it, it's so true. When your pool is sparkling clean and looking great, you and your friends look at it. Then go for a dip! But if it's dirty, green and unpleasant and not as good as it could be, it looks back at you, crying for attention. Nobody likes that. Peter Zotti was having that trouble. Even after spending some \$250.00 on chemicals, the pool was still not right. In fact it looked cloudy and real bad.

Peter found out about Care-Free and called Bob. Having had a pool for decades, Bob knew exactly what to do. Peter bought some pool floc (basically alum) for about \$15.00, to settle colloidal matter, reduced pH to 7.2 with a little acid and installed a Care-Free SWP40. Within just two days Peter's pool underwent a remarkable transformation into a sparkling, clean show-piece.

"Care-Free gave our pool the WOW FACTOR. It's a joy not only to look at but also to swim in. What's more all our visitors remark on how clear it looks. And the kids don't complain about the harsh smell of chlorine or get sore eyes. It's awesome," Peter says.

The Care-Free SWP40MkII, is installed after the filter on the return line to the pool. The conditioning process allows the chlorine to work more effectively at sanitizing your pool. It does so by creating more free chlorine to oxidize and combine with hydrogen and so produces the disinfectant Hypochlorous Acid (HOCl), the principal oxidant in pool water.

By eliminating cohesion between mineral particles in water, Care-Free dramatically reduces micron size. For example, 300 micron down to 30 micron. Because there is less light refraction from the smaller particles, the pool water becomes clearer.

Bob reckons a Care-Free SWP40MkII on your pool will more than halve your chemical use and dramatically extend the life of your salt chlorinator.

Your customers will be pleased to know there is absolutely no maintenance required on the new SWP40MkII.
